

Demanded by homeowners for years, at last there's a solution to expensive sun-damage & fading.

3M PRESTIGE 70 SOLAR WINDOW FILM looks **CLEAR**. That's right, clear.

It has all the benefits of tinted solar film such as UV filtration, fade reduction, glare reduction & heat rejection but it does not detract from the aesthetic appeal of glass or your view - in fact, visually, you can hardly tell it's there.

Most home owners are only too aware of the damaging effects of sun to furnishings including, couches, curtains, carpets, photos and artwork. Many however do not realise that even in your home you are susceptible to sunburn. Until now, sun within your home has equalled damage.

Prestige solution:

- **It won't detract from your view**, you can hardly tell it's there
- It has no metallic properties like normal solar films so it **won't corrode or interfere with mobile phone** signals. It also makes it ideal for **coastal properties** exposed to sea air.
- **UV rays are reduced by 99.99%** reducing damage to furnishings: art, carpet, curtains & couches
- **Reduced glare** improves overall comfort & squinting
- **Less reflection** on TV screens & computer monitors
- **97%** of the sun's **infrared heat is rejected** reducing air conditioning costs in hotter months & improving temperature balance
- Prestige is endorsed by the **US Skin Cancer Foundation**
- Optional '**security-strength**' offers defence from would-be intruders and protection from severe **glass related injuries** caused by running or walking into windows and ranch-sliders
